Kurt Baum & Associates

OUR BACKGROUND:

Kurt Baum has been designing residential since 1991; Kurt Baum & Associates was established in 1999.

OUR STYLE:

We try not to define ourselves with just one particular style. Instead, we listen to our clients and interpret their vision. This “listen first” approach helps us identify needs and provide the best possible architectural design solutions.

BRINGING VISIONS TO LIFE:

Architects bring visions to life. If it’s a good vision, the results can be spectacular. We have specialized knowledge and technical and ethical standards. An experienced architect can help you get the

most out of your site: optimizing views, maximizing energy efficiency, and fitting into the context of the neighborhood. We can help you develop a plan specifically for you and your family by pulling together your home’s aesthetic, functional, and structural considerations into a unified whole.

OUR SERVICES:

While we provide full service architecture, we can and often do tailor our services to meet the wishes of the client.

ARCHITECTURE IS ... about designing environments that support and enhance our clients’ daily lives.
